Spaces Re-Imagined, Safely

The Vanish is the perfect wipes and waste combo, with a dispenser for sanitizing wipes on top and a waste collection stream below, making used wipes or PPE disappear. Its smooth and classic design complements any space while also allowing the perfect surface for customized labeling. The wipes dispenser accommodates any size of wipe container, either hardshell or large volume rolls. With front door servicing, an optional lock on the cabinet and a compact space-saving design, the Vanish is an easy choice for any public facility.

MATERIAL & CONSTRUCTION DETAILS

Not all recycling, waste or PPE receptacles are created equal. Our company policy is never to compromise on our workmanship or the quality material standards we've set. We only recommend and use quality first grade materials on our containers, and source these from OEM's at highly-competitive prices. Being a manufacturer that buys at high-quantities gives significant buying power with companies which in turn saves you money.

The design process, materials used, finishes and manufacturing standards all affect the final product. Every decision is vital to getting the most value for your investment. You deserve recycling, waste and PPE containers that meet your demands for quality and durability and will enhance your working environment for years to come.

Component	Material(s)	Construction

INSTALLATION

Busch Systems® Vanish Series containers are hassle-free when it comes to installation. Each container comes fully-assembled and individually boxed using high-density cardboard with high-recycled content to ensure safe and environmentally friendly transport.

To install your Vanish Series containers:

1. Remove unit from pallet and place in desired location
2. Open the front door to install your hand wipes on the top shelf and through the dispenser opening.
(Please Note: Dispenser is not included in the purchase of the Vanish Units).

CARE & MAINTENANCE

Advantages of Busch Systems Composite Board receptacles include:

- Highly-durable material and is able to withstand physical stress to a greater degree than wood.
- Minor dings and scratches are much less likely to bend your containers out of shape or leave the finished scratched.
- More moisture and heat resistant when compared to wood, allowing for them to better stand up to the stress associated with heavy use.

Their appearance and lifespan will be greatly affected by their care. The frequency of cleaning required depends on the environment in which the containers are used. The Vanish Series is intended for Indoor Use Only.

To avoid the accumulation of dirt and grime on your Busch Systems products, and help prevent corrosion, we recommend that a mild detergent be used (not an abrasive), such as a pH-neutral liquid (hand dishwashing or hand car washing soaps, for example) diluted in warm water. Rinse well with clean water. Any dirt adhering to the powder coating should be removed. In order to remove deposits such as salt or dust, use a soft brush (non-abrasive). If this is not sufficient to remove stubborn soiling, the following products have been tested for use:

- Ajax Cream
- Liquid Gumption
- Flash (in water)
- Ajax Liquid (in water)
- Cutting compound ('T. Cut')

Note: Always test soaps/cleaners on a hidden and/or small area beforehand

If solvents are absolutely needed to remove marks, a soft cloth dampened with white spirit may be used.

GENERAL CARE

- Clean with a mild detergent and damp sponge or cloth
- For tougher cleaning purposes, Lysol, TSP or Spray Nine may be used
- To remove permanent marker on melamine, use a small amount of Lacquer Thinner or Acetone on a cotton rag

THINGS TO AVOID

- Cleaners with chloride or bleach
- Strong Solvents
- Abrasive detergents
- Steel wool or Scouring pads
- Trapped moisture between product and things like rubber mats
